This is the image, color, or pattern that you see on the main operating system screen after you boot your computer. In the picture, you can see an example of a Microsoft Windows XP desktop that includes wallpaper depicting white clouds in a blue sky above a green hill. Confusion between a screen saver and wallpaper Many new computer users confuse wallpaper with a screen saver, which is the moving image or animation that is displayed when you settle for a computer. Check out our screen saver page for more information and related links this term. Related pages background, desktop, GUI, live wallpaper, OS terms, Windows theme I love Halloween. It's my second favourite holiday just for Christmas, but it has a special place in my heart that I get a good back-to-back sea my birthday and then, 24 hours later, all the halloween good brings. The guys at DualBoot Games (creators of other live wallpapers like Celtic Garden HD) have whipped up another for us, this time all haunted and scary, just in time for Halloween. It's called Haunted HD Home, and when it comes to live wallpapers go, even though it was a sensitive time, it's probably one of the most detailed I've come across. From the moment you pop open the live wallpaper selector and choose Haunted House HD, the Halloween atmosphere will wash over you. A camera flies near a creepy house, shrouded in fog, with the lights flashing intermittently. And scary messages appear above the door in blood, everything's pretty smooth, despite the fact that there's so much going on. The door opens and closes on its own while the camera sweeps back, the lights turn on, revealing silhouette in the window, and the flag on the mailbox moves up and down by itself. If you want to get inside the house, you'll need to jump into the completely loaded settings menu and change the camera display. The inside of the house is just as (if not more) busy than exterior. The lights keep flashing, the fire is pale, ghostly blue, and the paintings have skulls on the subject's face. Heavenly footsteps knock and disappear on the floor, and strange winds throw the chandelier around. It's a lot to take in, but it's still a lot of fun. Back to the settings menu, when I said loaded, I meant it. You can select your camera view, set the name for the mailbox and hatch, choose the type of face you want for the pumpkins, and personally enable or disable each variable that wallpaper has to be enabled or disabled separately. If you want to get in the holiday spirit, Haunted HD House is \$1.99 on the Android market. We have more photos and download links after the break.
